

POOR ORIGINAL

Wednesday, May 2, 1979

Dear Sirs:

I have written to the Pennsylvania Emergency Management Agency for information concerning the Three Mile Island nuclear power plant. My reply was to write to you requesting photographs, designs, drawings, and other related materials about the nuclear "accident."

My science class is involved in a nuclear energy project, and I would be very thankful for such information. I'm interested in this valuable information about the nuclear plant. Any of the following subject matters will be involved and needed in the project: ① photographs, ② designs, ③ drawings, ④ and any valuable information concerning the nuclear plant and the "accident." Any materials concerning other nuclear power plants will be valuable, also.

I watched a television program on CBS last night about the "accident" and the plant. Your organization was noted, therefore; I am expecting much information about the nuclear era. I thank you for your help!! Also, please put a "rush" on these materials, because of the time period.
