Bethesda, Maryland

Dear Sirs,

The accident at T.M. 1 showed  
Met. Ed. to be incompetent to  
operate a Nuclear Power Plant.

Their License must be revoked

There must also be a moratorium  
on licensing any Nuclear power  
plant either under construction or  
in operation until all problems  
have been resolved.

(Waste disposal, water pollution....)

You are responsible of 200,000,000  
lives in this country - for the land  
on which they live!

Sincerely

Evelyn Stone
