This week I called the governour hotline about three mile island. I called concerning some information on the history, construction, and a general overall view of the island and the plant on the island.

From the conversation, I was told about a pamphlet your corporation had put out on the three island plant. I asked if she could send it to me. Unfortunately, she only had one copy of the pamphlet and gave your address for the publication.

Could you send it to me, I need it for a project at Shippensburg State College about the efficiency of nuclear power. If you could, have it sent before April 28. Thank you.

Cordally Yours,
Robert J. Quigley
