29 March 1979

To: U.S. Nuclear Regulatory Commission  
Director, Division of Project Management  
Office of Nuclear Reactor Regulation  
ATTN: Mr. Roger S. Boyd

Dear Mr. Boyd:

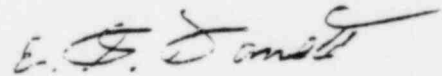

The 5 June 1978 issue of the Federal Register published an Order for Modification of License for Three Mile Island Nuclear Station, Unit 2.

I would appreciate it if you would tell me if this Order for Modification of License was still in force at the time of the recent accident at TMI - 2?

If so, did any of the problem areas addressed in the Order for Modification play any role in the accident or post accident events? Was there any loss of off-site power experienced and was there any problems with the diesel generators experienced?

Further, I would deeply appreciate being placed on the mailing list of DOCKET NO. 50-3201 as well as on the mailing list for single copies of investigative reports on the accident.

Sincerely,
