

August 29, 1979

Mr. Joseph M. Hendrie, Chair
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Hendrie:

After the TMI "incident" I felt certain that neither local officials nor government in Washington would think of subjecting the residents of Central Pennsylvania to any more nuclear madness. I guess I was naive.

I don't want Unit 1 reopened; I don't want radioactive killer steam released; and I don't want radioactive killer water dumped into our river.

I don't represent BIG MONEY or the powerful elite. I am a working woman who does not wish to lose everything I've worked for over nuclear folly.

Don't open TMI again, ever. Bury it. Make it a monument for the '80's. Metropolitan Edison had its chance, and blew it.

Sincerely,

Jane Perkins
Secretary/Treasurer
