Nuclear Regulatory Commission
Middletown, PA 17057

Members of N.R.C. :

What value do you place on a human life? In light of the recent events at T.M.I. it must be a very low one. Your toleration of the practices used by Metropolitan Edision shock me.

I feel Met. Ed. has well demonstrated they cannot handle the responsibility of running a nuclear facility. Their intrest in making the all mighty dollar shadows their concern for the surronding environment.

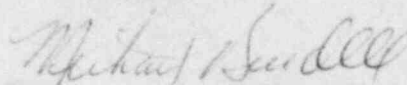

This to me is a degrading slap in the face which shows Met. Ed. has no concern for the well being of the community or its inhabitants.

The results of the accident have been devostating to real estate. Also the mental anguish caused to people cannot be removed until the plant converts to an alternate source of generation. Additional costs for an alternate source that does not pose the health risks of nuclear would be better than paying for Met. Eds. nuclear blunder.

I personally will not invest any monies for expansion of properties or construction of housing until you the N.R.C. call for the revocation of Met. Eds. nuclear generating license.

I will express my opinion to as many area people as possible so the lifting of their license can become a reality. This situation does not have to exist so please consider the consequences of Met. Eds. past and present actions.

Thank you;

Michael Bardell
