

11/11/45
Monday - 145 P.M. - afternoon
Deck 150-320
50-289

Dear Sirs:-

Am writing in regards
to Nuclear at 3. Mile Island.
I live near there. And would
sincerely like to see the plant
shut down as I am afraid
of it. They can convert
into other fuel. Nuclear
is not safe it is deadly
stuff. And I sure don't believe
the N.R.C. and Metropolitan Ed.
They ~~stink~~ stink and don't
tell the truth. So you
better get on the side of the
people and not the fig

8003170086

utilities.

Please hear what the
people are telling you
people. We don't want
it. It isn't safe -

" " economical
it is very expensive they
are finking out so please

shut the Dam Plant
down and run it on

coal or something else

safe. Where lives
are not concerned.

(I love to live) but how long?
