Washington, DC 20555  
Attn: John Linehan

Dear Mr. Linehan:

TVA possesses Source Material License SUA-816, Docket No. 40-1341, for the Edgemont Uranium Mill. I would like to know when TVA acquired this license, whether the license was transferred to TVA from Susquehanna Western or applied for separately, and when the Edgemont mill license is up for renewal or expires. Also, please send me a copy of the license for the Edgemont mill. I only need a copy of the actual license, not application papers.

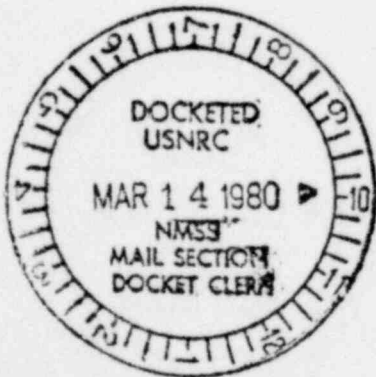

I talked with D. Gillen from your office on 2/29/80, asking about copies of mill licenses for Union Carbide's Gas Hills Mill, SUA-648, Docket No. 40-299 and United Nuclear's Morton Ranch Mill, SUA-1356, Docket No. 40-8602. He said he would remind you to send them. I also asked for a copy of Federal American Partners' Environmental Report on their Gas Hills Mill, Docket No. 40-4492. Gillen said he would notify FAP to send me a copy.

Thank you for your help.

Sincerely,

*Nancy Burks*
