16 April 1979

Dear Sir:

When viewing the scene of Hiroshima after it was nuclear destroyed in World War II. I was very thankful that this scene was in the land of the enemy and not in the U. S. Little did I realize that this scene would be brought back to mind and be able to occur in my backyard. This surely is not the American way of life. When citizens and their property are placed on the sacrificial altar so that a conglomerate can satisfy its profit hungry investors so that they get their pound of flesh.

I appeal to Rep Geesey, Gov Thornburgh and Congressman Ertel to be on the side of David to bring down the giant and close his nuclear toy, forever. We were the center of the disaster spotlight of the world for a period of days. Keeping our watchful eye on the sick monster over the hill who at anytime would regurgitate his nuclear gas and have us evacuate with the deep-gutted feeling within that we could possibly be bidding farewell to everything we have worked hard for all of our life, forever.

The only feeling I have left is to say to Met Ed that we, the prisoners of T.M.I. have Bit the Bullet. Now it is Met Ed and its investors turn.
