Subject: Arkansas Nuclear One-Unit 1
Docket No. 50-313
License No. DPR-51
Subject: IE Bulletin 79-14
(File: 1510)

Gentlemen:

By letter dated November 27, 1979, you were informed that following pipe stress analysis of ANO-1 "accessible piping" per IE Bulletin 79-14, re-analysis of pipe support loads revealed some loads to be in excess of those shown on the support drawings. Although an initial engineering evaluation revealed no inoperable supports, we committed to provide you with the results of more extensive analytic evaluations by February 9, 1980.

A recent outage of ANO-1, however, has provided us the opportunity to work on normally inaccessible piping. Due to these efforts the evaluation of support loads for accessible piping has not been completed. ANO-1 has been returned to service and analytical work on accessible piping support loads is now in progress. We plan to provide you with the results of this analysis by April 10, 1980. The results of required analysis for inaccessible piping will also be provided by this date as stated in our letter of January 7, 1980.

Very truly yours,

David C. Trimble
