# This preliminary notification conscitute EARLY notice of events of POSSIBLE saiety or pulibic interest significance. The information presented is as initially received without verificalion ut evaluation and is basically all that is known by lt: staff as of this date. 

Facility: Kerr-McCec Nuclear Corporation Cimarron, OK
Docket No. 70-1193
Subject: Allfi:fin flutonium exposure

#### Abstract

As reported in the original PN-ILT-79-62, a former Kerr-McGee employee had requested cxamination to determine whether he had received a significant intake of plutonium while employed from about 1969 to 1972 at the Cimarron Plant. (The plant where Karen Silkwood worked.) On January 7 and 8, 1980, the man visited T.os Alamos for whole body counting, special chest counting, and collection of urine samples.

Los Alanos has reported that neither plutonium nor amtricium was detected by measurements capable of detecting a fraction of the present permissible internal deposition.

Region III (Chicago) plans no press release on this matter and knows of no press awareness of this mattor.

This Preliminary Notification is hereby closed.
