Docket No. 70-25

Rockwell International
Energy Systems Group
3800 DeSoto Avenue
Canoga Park, California 91304

Attention: Mr. Robert Jones
Vice President

Gentlemen:

Reference: Dr. M. E. Remley's letter of March 31, 1980 to Mr. L. R. Norderhaug

Thank you for the referenced letter in response to our Notice of Violation dated March 10, 1980. Based upon the information provided in that letter and at a meeting with you and members of your staff on April 17, 1980, we note the following:

1. With reference to Item 2 of the Notice of Violation, the meeting brought to light information unknown at the time of the exit interview which affects the apparent item of noncompliance dealing with alert codes. It appears that the codes as discussed at the meeting comply with the basic requirements as they presently exist.
2. The corrective action described with regard to the remaining items: Item 1, providing certain guards with spare eyeglasses, and Item 3, assuring adequate training in contingency plan procedures appears adequate.

We will review the implementation of these security measures and corrective actions during our next visit.

It has been, and continues to be, the practice of the Office of Inspection and Enforcement inspectors to hold exit meetings with licensee management after each inspection. These meetings are for the purpose of a full and free exchange of information and to specifically discuss significant results of the inspection. We trust that such meetings can continue to be a forum for frank discussion of the inspectors' findings and any mitigating conditions of which you may be aware.

APR 21 1980

We appreciated the opportunity provided by your visit to discuss mutual problems of communication and to clarify certain report inaccuracies identified in your letter. While those inaccuracies, with one exception, did not significantly affect the findings, they have been noted in our records.

Sincerely,

R. H. Engelken
Director
