Dear ~~REDACTED~~ <sup>121</sup> ~~BLUE~~ <sup>121</sup> Island Park, &  
Aegean Isles

I decided to address this brief communication to you. The trouble with brief communications is that very few words can be incredibly ambiguous.

I had hoped to write something formal into the record of the Workshop 1-22-80 before the deadline. Higher priority activities have intervened, as I knew they would. (Please do not be offended if the NRC is low on priority.)

Having <sup>as a favor</sup> requested a 3 ft high stack of your paper from the Des Plaines landfill, I have been instructing my fellow Illinoisans in the existence of the Federal Register, among other things. Hopefully in time for resumed hearings at Morris on Feb. 29th

Time did not permit me to call your attention to 2 objects on the table in front of me, one a table card reading "PRESS", the other an issue of the Falmouth (Mass) Enterprise. \* Sampa

at Annual Meeting, evening of 1/21/80, of your  
Mrs. Klotz. Workshop. Unfortunately,

I did not finish the book,  
(the book is Medvedev's Nuclear Disasters in the U.S.S.R.)  
however the first several

chapters were quite interesting.

Thanks for bringing this  
book to my attention, I hope  
to finish it in the future.

So don't tell him about RBB.

your workshops - he'll have more time to read  
the books I suggest to him. He currently has my  
kind copy of Dostoevski's Crime & Punishment.
