

8 May 1980

Mr. Harold Denton,

I live in Greenfield, Mass a small town in Western Massachusetts. 25 miles to the west is Yankee Atomic, Rowe, Me. 25 miles to the north is Vermont Yankee Vernon, Vt. and in the planning is a nuclear plant scheduled for the Montague Plains Montague, Me. which is 10 miles to the east.

I have come to fear nuclear plants greatly and being surrounded by two plants, with one in the planning stage makes me want to quit my job and move my family as far away as possible, only there is no place to go.

So I am asking (pleading) with you to, please revoke the operating licenses and hold public hearings here in our region on the decommissioning regulation of Vermont Yankee.

No. I'm sure you know Vermont Yankee's record is not that terrific and especially after three miles I don't find it very difficult, actually impossible to believe the Public Relations personnel of any Nuclear Plant.

Again.

"Please revoke the operating license and hold public hearings here in our region on decommissioning regulations of Vermont Yankee."

Thank you for your time.

Sincerely,
Joanne B. Barry
