

490

I'd like to express my
 concern about the 2,500
trucks carrying waste
(high and low level?) from
Three Mile Island to Hanford,
Washington! What precautions
 are being taken? Guards?
 Certainly you are considering
 that with that many trips
 a percentage of accidents can
 be expected, what is being
 done to protect human life
 enroute.

I also am upset by con-
 ditions and leakage at the
 waste dump in Washington,
 Won't this complicate the
 pollution problems there?

THIS DOCUMENT CONTAINS
 POOR QUALITY PAGES

... it seems that nuclear
energy is an inevitable
option until transportation
and waste storage problems
are ironed out.

Hope you will
be sending information.

- Thanks
