

(81) April 2, 77

How can you ever think of raising our electric bills to pay for the accident at T.M.I.

I am going to try to reduce my electric use by 13% (the nuclear part of electric power) and I will deduct 20% from my bill if you try to pass these costs onto us.

I have already sold 2 of my electric appl. and am going to get rid of 2 more.

My family is forbidden to buy me any electric gift

I will flatly refuse it. Sincerely,
P. M. W. Cameron
