Nuclear Regulatory Commission:

I am writing to encourage the NRC to hold all hearings concerning the La Crosse Boiling Water Reactor in La Crosse, Wi. so that area residents may attend. I was appalled to learn that a hearing scheduled for Washington D.C. was cancelled after a carfull of La Crosse residents had left to drive all the way to the East Coast for the hearing. This type of unfortunate incident could be avoided by conducting the hearings in La Crosse.

As a resident of the area within 15 miles of Genoa, Wi., I am concerned about what is happening at the nuclear power plant there. Please don't make it more difficult than it is already to learn about that situation by holding your sessions in Washington.

Thank you.
