

UNITED STATES NUCLEAR REGULATORY COMMISSION

DOCKET NO. 50-327

TENNESSEE VALLEY AUTHORITY

NOTICE OF ISSUANCE OF AMENDMENT

LICENSE NO. DPR-77

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 1 to License No. DPR-77, issued to Tennessee Valley Authority (licensee) which revised Technical Specifications Appendix A issued with License No. DPR-77 for the Sequoyah Nuclear Plant, Unit 1. These changes deal with the auxiliary feedwater system, the rod position indicating system, divider barrier surveillance, and the correction of typographical errors. The amendment is effective as of its date of issuance.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the amendment does not authorize a change in effluent types or total amounts nor an increase in power level and will not result in any significant environmental impact. Having made this determination, it has further been concluded that the amendment involves an

action which is insignificant from the standpoint of environmental impact and, pursuant to 10 CFR Section 51.5(d)(4), that an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) Tennessee Valley Authority letter, dated March 29, 1980, (2) Amendment No. 1 to License No. DPR-77 with Appendix A Technical Specification page changes, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N. W., Washington, D. C. 20555, Attention: Director, Division of Project Management.

Dated at Bethesda, Maryland this 22nd day of April, 1980.

FOR THE NUCLEAR REGULATORY COMMISSION

L. S. Rubenstein, Acting Chief
Light Water Reactors, Branch No. 4
Division of Project Management
