Dr. Bernard J. Snyder, Program Director
Three Mile Island Program Office
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

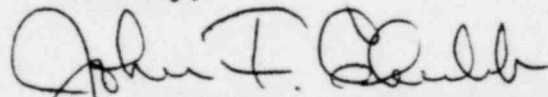

Dear Dr. Snyder:

I have reviewed the NRC's "Environmental Assessment for Decontamination of the Three Mile Island Unit 2 Reactor Building Atmosphere" and the addenda. It would appear to me that the NRC's staff has done a thorough job on considering all of the alternatives for the decontamination of the Three Mile Island Unit 2.

I believe that the decontamination process must begin as soon as possible and that to delay it much longer will add to the further risk of accidental releases and continue to cause concern for the vocal minority of our area.

Thank you for this opportunity to express my opinions.

Sincerely,

JOHN F. CHUBB, CPA
