Dr. Joseph M. Hendrie  
Chairman  
Nuclear Regulatory Commission  
Washington, D.C.

Dear Dr. Hendrie,

I am sorry  
the gas bubble formed, but please  
answer these questions truthfully.  
How far has this cloud traveled?  
How did other nations take this?  
Did it affect them in any way?  
If so, how and what will they  
do? Should we not have these  
plants so it won't cause any more  
problems? Also, tell me what went  
wrong instead of a human error.  
If there was a human error what did  
he do wrong?

Please answer all my questions  
soon. Thankyou

Sincerely yours,  
Patti Dawson
