

Dear Mr. Macie,

As a Newbury Township
resident I am imploring
your commission to
please tighten regulations
concerning nuclear
power plants. I am
looking forward to seeing
clearly defined changes
in the inspection and
operation of power plants.

Mr. Menton did an
admirable job but why
wasn't he hospitalized on
the first day of the
incident? Are personnel
at nuclear plants
specifically trained and
if so by whom? No

(11)

you know if it's true
that political advisers
~~of the president~~
~~to Clinton's release?~~

It may sound pre-
sumptuous of me but please
believe my concern is
sincere. If nuclear
power is America's
salvation then let it
not also become her death.

Sincerely,
Judy Kipper
