Dr. Bernard J. Snyder  
Program Director  
Three Mile Island Program Office  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, DC 20555

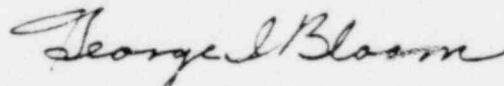

Dear Dr. Snyder:

I received your letter of April 21st and the report on "Environmental Assessment for Decontamination of the Three Mile Island Unit 2 Reactor Building Atmosphere".

I have no scientific background with which to base opinion on your report. However, as Chairman of the Pennsylvania Public Utility Commission for a ten-year term, I did acquire some knowledge about the energy situation. I think that Three Mile Island Unit 1 should be back in operation as soon as possible, and that Unit 2 should be decontaminated at the earliest possible date. We need all of the energy possible from every source.

I appreciate receiving your report.

Sincerely yours,

George I. Bloom
