License No. SMB-1314

Gentlemen:

This refers to the special inspection conducted by Ms. N. A. Nicholson of this office on April 14 - 16, 1980 of activities authorized by license number SMB-1314 at the Weldon Spring Chemical Plant in Weldon Spring, Missouri.

This inspection consisted of taking simultaneous water samples with representatives of the ARRCOM Safety Office both on and off site to determine if any off site migration of contaminated material has occurred. In addition, independent soil samples were also taken. When results of our analyses become available, our results will be compared.

No items of noncompliance with NRC requirements were identified during the course of this inspection.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

A. B. Davis, Chief
Fuel Facility and
Materials Safety Branch
