Mr. G. Wayne Kerr
Asst. Dir. for State Agreement Programs
Office of State Programs
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Kerr:

This is in response to your letter of March 27, 1980, concerning the NRC annual review of the Nevada radiation control program which was conducted March 4-7, 1980.

We now plan to make partial inspections of NECO's licensed operation on a monthly basis and arrange that the scope covered by three such inspections will add up to a complete inspection. Each complete inspection will be documented and summarized with the licensee.

State inspectors have been instructed to always inform management at a licensee's facility on first contact that an inspection will be made of those operations authorized by the license.

Sincerely,

John Vaden
Supervisor
Radiological Health
