Trojan Nuclear Plant
Docket 50-344
License NPF-1
Radiological Emergency Plan

Director of Nuclear Reactor Regulation
ATTN: Mr. Robert A. Clark, Chief
Operating Reactors Branch No. 3
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir:

On December 4, 1979, Portland General Electric Company (PGE) submitted a draft copy of the Trojan Radiological Emergency Plan for your review. Subsequently, we received comments on the draft from the NRC Emergency Planning Review Team. These comments have been resolved and we are hereby forwarding to you a second draft of the Trojan Radiological Emergency Response Plan (RERP). The RERP is Chapter 2 of the Trojan Radiological Emergency Plan and Procedures Manual (Manual) which includes the emergency plans of the States of Washington and Oregon, Columbia County, Oregon, and Cowlitz County, Washington, the U. S. Coast Guard and agreement hospitals. We are also including Chapter 1 of the Manual with this submittal as it contains overview information common to all chapters of the Manual.

In addition, we are forwarding to you, as an attachment to this letter, an index of the RERP versus the NUREG-0654 acceptance criteria to simplify the review process.

Two portions of the RERP are still under development at this time:

1. The public notification system is still being designed. We anticipate submitting a design proposal for review by FEMA and the NRC by June 1, 1980.

2. The recovery plan (Section 9.2 of the RERP) is still under development. We estimate that the plan will be completed and implemented before January 1, 1981.

We now anticipate that the RERP will be implemented by October 1, 1980. We will inform you of any changes in the above schedules.

Sincerely,

C. Goodwin, Jr.
Assistant Vice President
Thermal Plant Operation and
Maintenance
