E. G. Case, Chairman
Regulatory Requirements Review Committee

REQUEST FOR RRRC CONSIDERATION - PROPOSED REVISION TO STANDARD REVIEW
PLAN 5.4.7 RESIDUAL HEAT REMOVAL SYSTEM

I request review by the RRRC of a proposed revision to SRP 5.4.7 that would incorporate proposed Branch Technical Position RSB-5-1. This branch position documents the current NRR position on RHR systems that resulted from our reviews of RESAR-41 and GESSAR, and which has been stated in letters to GE and Westinghouse from Roger Boyd dated November 12, 1975.

The following material is provided for review:

1. Working Paper on Residual Heat Removal (includes impact statement).
2. Proposed Branch Technical Position RSB-5-1.
3. Draft Proposed Revision to SRP 5.4.7 (annotated to indicate proposed changes).
4. Current SRP 5.4.7.

A handwritten signature in cursive script, reading "Robert E. Heineman".

Robert E. Heineman, Director
Division of Systems Safety
