

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

April 11, 1980

MEMORANDUM FOR: Tom Rehm, Assistant for Operations  
Office of the Executive Director for Operations

FROM: Carlton Kammerer, Director  
Office of Congressional Affairs

SUBJECT: RESPONSE TO INQUIRY OF CONGRESSMAN ARCHER

Attached is a request received by Congressman Archer, which has been referred to our office for response.

Could you have the appropriate staff check if the matter of the concern to Mr. Archer's constituent is addressed in either the Action Plan or our revised research program or both and prepare an appropriate response for the Congressman to forward to his constituent?

Also, if staff has a copy of the paper by William R. Stratton cited by the constituent, the Congressman would appreciate a copy.

CARL W. (Bill) HOSTETTER  
CONSULTING METEOROLOGIST  
FORENSIC STUDIES/SOLAR GEOPHYSICS

March 27, 1980

Honorable William Archer  
U.S. House of Representatives  
1024 Longworth House Office Building  
Washington, D. C. 20515

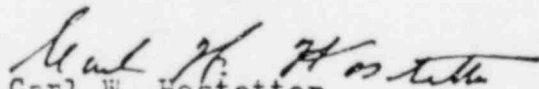

Dear Sir:

With reference to the Kemeny Commission Findings and Reports, I would inquire as to the status of that portion dealing with "Hypothetical Fuel Melting Accidents" which I understand is included in the "Technical Staff Analysis Report on Alternative Event Sequences to President's Commission on the Accident at Three Mile Island", by William R. Stratton, et. al., October, 1979.

I would also request your assistance in obtaining a copy of this section of the study as soon as possible.

Any expenses involved with this request will be responded to promptly.

Your loyal constituent,

  
Carl W. Hostetter
