

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

MAY 16 1980

Generic Task A-12

The Honorable John D. Dingell, Chairman
Subcommittee on Energy and Power
Committee on Interstate and Foreign Commerce
United States House of Representatives
Washington, DC 20515

Dear Mr. Chairman:

Enclosed for the information of the Subcommittee on Energy and Power is the "For Comment" edition of NUREG-0577, "Potential for Low Fracture Toughness and Lamellar Tearing on PWR Steam Generator and Reactor Coolant Pump Supports". This report provides the staff's resolution of the NRC's Generic Technical Activity A-12, which had been declared an "Unresolved Safety Issue" pursuant to Section 210 of the Energy Reorganization Act of 1974. NUREG-0577 describes the technical issues, the technical studies performed by an NRC contractor, the NRC staff's technical positions on fracture toughness of steam generator and reactor coolant pump support materials based on these studies, and the staff's plans for implementing its technical positions. It also provides recommendations for further generic research regarding lamellar tearing. The Electric Power Research Institute has been asked to fund and manage such research.

We intend a 60 day public comment period for NUREG-0577. Also enclosed for your information is a Federal Register Notice we have issued on this matter.

Sincerely,

A handwritten signature in cursive script, appearing to read "Harold R. Denton".

Harold R. Denton, Director
Office of Nuclear Reactor Regulation

Enclosures:

1. NUREG-0577
2. Federal Register Notice
