Trojan Nuclear Plant
Docket 50-344
License NPF-1
License Change Application 53,
Revision 1

Director of Nuclear Reactor Regulation
ATTN: Mr. Robert A. Clark, Chief
Operating Reactors Branch No. 3
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir:

License Change Application (LCA) 53 transmitted the safeguards contingency plan for the Trojan Nuclear Plant as part of Revision 4 (March 1979) to the Trojan Nuclear Plant Security Plan on March 23, 1979. Your letter of March 6, 1980 (A. Schwencer to C. Goodwin, Jr.) provided NRC comments on the safeguards contingency plan. In response to your comments, we are now submitting Revision 1 to LCA 53 as Attachment 1 to this letter and the enclosed Revision 4 (April 1980) to the safeguards contingency plan. Because the enclosures contain security information specific to Trojan, it is requested that they be withheld from public disclosure in accordance with 10 CFR 2.790(d).

The responsibilities of personnel identified in this safeguards contingency plan are assigned in a manner that precludes responsibility conflicts that would prevent execution of the plan in any safeguards contingency situation. Also, throughout the revised safeguards contingency plan, the titles "Plant Superintendent" and "Assistant Plant Superintendent" have been changed to "General Manager" and "his designated alternate" or specific management title where applicable, respectively. These title changes are in effect at Trojan and will also be shown in the next revision to the Trojan Security Plan. Pending your review and approval, this safeguards contingency plan will be inserted as Chapter 8 to the Trojan Security Plan (PGE-1017).

Please acknowledge receipt of the enclosed Copies 8 through 12, inclusive, on the enclosed form and return it to R. L. Sullivan at the above address. Please destroy the superseded pages of the safeguards contingency plan that are identified as Revision 4 (March 1979).

Sincerely,

C. Goodwin, Jr.
Assistant Vice President
Thermal Plant Operation and
Maintenance
