

MAY 13 1980

MEMORANDUM FOR: D. Eisenhut, Director, DL
R. Vollmer, Director, DE
D. Ross, Director, DSI
S. Hanauer, Director, DHFS

FROM: R. J. Mattson, Director
Division of Safety Technology

SUBJECT: LONG-RANGE RESEARCH PLANS

Attached for your information is a copy of the input from NRR to RES to be used in development of a draft plan for long-range water reactor safety research. In view of the reorganization of NRR and the assignment of key management personnel to new positions, I want to ensure you and your senior staff are aware of the views NRR has taken. RES has not completed its development of these plans, and there is still opportunity for additional commentary if you or your staff should have any concerns with the approaches being considered.

Original signed by
Roger J. Mattson
