

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

May 5, 1980

OFFICE OF THE
SECRETARY

MEMORANDUM FOR: William J. Dircks, Acting
Executive Director for Operations

FROM: Samuel J. Chilk, Secretary 

SUBJECT: SECY-80-103B - PROPOSED LICENSE TO EXPORT SOURCE MATERIAL TO
FRANCE (LICENSE APPLICATION NO. XU08473, SECY-80-103A)
(COMMISSIONER ACTION ITEM)

This is to advise you that the Commissioners have reviewed the subject license to the U.S. Representative Office of ENEL. The Commission (with all Commissioners approving) has accepted your recommendation to export to France 20,000 metric tons of depleted uranium in the form of uranium hexafluoride.

In connection with his approval, Commissioner Gilinsky provided the following statement: "I note this export is equivalent to about 30 reactor reloads. I approve on the understanding that this depleted uranium will be treated as would be natural uranium."

The Office of International Programs was informed of this action by telephone on May 2, 1980.
