DOCAET NUMBER DE PROMUSED RULE !

Gentlemen:

Mississippi Power & Light Company (MP&L), as agent for and co-licensee with Middle South Energy, Inc., is presently constructing the Grand Gulf Nuclear Station, Units No. 1 and No. 2, near Port Gibson, Mississippi, and is responsible to the Nuclear Regulatory Commission (NRC) for the licensing and future operation of the facility. With regard to the proposed amendment to Regulations, 10 CFR Part 19, promulgated by the NRC in the Federal Register on March 26, 1980, 45 F.R. 19564, MP&L submits the following comments:

(1) The published draft of the proposed rule contains certain ambiguities and is, therefore, subject to overbroad interpretation and application. Specifically, the proposed rule would give both the licensee and the NRC inspector the option of inviting to the informal inspection conference "individuals with legitimate interests in matters pertaining to the inspection" without adequately defining who has a "legitimate interest" within the meaning of the rule. Absent additional clarifying language, the rule is potentially overbroad in its scope and application and could be misinterpreted so as to include individuals who do not have specific interests in matters relating to the inspection. MP&L, therefore, proposes that the rule be revised so as to be in accordance with the supplementary information published with the proposed rule by providing that the NRC inspector and the licensee have the option of inviting "workers, worker representatives, contractors, expert consultants, or management representatives retained by the licensee or by the NRC and having a legitimate and specific expertise and interest directly relating to the subject matter of the inspection."

(2) Since Section 19.14 (a) of the existing rule provides that "each licensee shall afford to the Commission at all reasonable times opportunity to inspect materials, activities, facilities, premises, and records . . .," MP&L suggests that the scope of the access to the licensee's materials, records, etc. by the NRC invitees under the proposed rule also be clarified. MP&L proposes that the NRC invitees be afforded access to only those materials and records discussed in the entrance and exit meetings which do not contain confidential or proprietary information.

If you have any questions or would like any additional information with regard to these comments, please let us know.

Very truly yours,

Norris L. Stampley

Vice President
