Grimes

Dear Mr. Grimes,

I am writing this letter in regard to a conversation we had on the telephone Tuesday, April 8, concerning the NRC proposal on evacuations. During that phone call we both came to agreement that to keep the information accurate, I should voice my questions in the form of a letter. Below is a list of questions I hope you will answer:

- A. What is the status of the NRC proposal about evacuation plans for local governments within ten miles of a nuclear power plant?
- B. If a local government chooses not to cooperate with the utility or the NRC because the local government feels that the nuclear facility poses an unacceptable risk to the community it represents, would this stop the plant from getting its license to operate?
- C. If so, was the NRC aware of this when the proposal was written and will the NRC go along with this means of intervention?
- D. Does the NRC consider this a viable and legal means for a local government to empower itself to a position of self-determination on this issue?

Thank you very much for your time and effort.

Sincerely

Scott Houchin
