WASHINGTON, D. C. 20555

MAY 15 1980

Michael S. Davison
General, U.S. Army (Ret.)
Technical Consultant
Axxon Trade Corporation
1800 M Street, NW
Suite 205, North
Washington, DC 20036

Dear Mr. Davison:

Thank you for the information on Chemtree Concrete Products provided in your April 24, 1980 letter to Chairman Ahearne.

As the NRC does not endorse the specific patented products that could be used in nuclear power plants, we do not believe that meeting with the Chairman would be useful. Your interest in the use of Chemtree Corporation Products might be best pursued through the Architect-Engineering firms or constructors who are directly involved in the design and construction of nuclear power plants.

The product-literature that you had left with my staff during the meeting on April 10, 1980, has been distributed to cognizant individuals within the NRC for their information and use.

Sincerely,

Robert B. Minogue, Director
Office of Standards Development
