

AXXON

TRADE CORPORATION

24 April 1980

Mr. John F. Ahearne  
Chairman  
United States Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Ahearne:

As a technical consultant to the Axxon Trade Corporation, I am writing to acquaint you with the truly unique concrete products of the Chemtree Corporation which Axxon Trade Corporation represents. Chemtree concrete products have exceptional anti-radiation qualities, high early strength, low maintenance, reduced cement requirements and normal compressive strength above 10,000 p.s.i.

Earlier this month representatives of Axxon Trade Corporation and Chemtree Corporation met with Mr. Hans Ashar, Structures and Components Standards Branch, and others in the Office of Standards of NRC. We made a detailed presentation to them at that time and were very well received. Now, let me suggest that Mr. Gordon Molesworth, President of Chemtree Corporation, and I meet briefly with you to explain the applicability of Chemtree products.

I will contact your office shortly to arrange a meeting at your convenience.

Sincerely yours,

MICHAEL S. DAVISON  
General, U.S. Army (Ret.)  
Technical Consultant  
1800 M Street, N.W.
