Commissioner Denton,

I am writing to request that public debate be held concerning the issues involved in evacuating large populations near nuclear power plants such as Indian Point, N.Y., Mt. Zion, Ill., and Limerick, Pa.

I am strongly opposed to such plants, and in particular in such densely populated areas. I do hope the NRC does realize and will reflect the strong public concern over such matters.

I believe Commissioners Bradford and Esilinski of your committee are attempting to represent the deep and growing concern of the public in relation to this issue.

A concerned citizen,
