Mr. Charles E. MacDonald, Chief
Transportation Certification Branch
Division of Fuel Cycle and Material Safety
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. MacDonald:

Certificate of Compliance No. 6400,
Revision No. 8 for Model No. 6400 Shipping Package (Supertiger)

In response to your letter of February 29, 1980 regarding the above refer-
enced shipping package, Battelle's Columbus Laboratories (BCL), as a
registered user of this package supplies the following information. The
information is organized in order to correspond with the numbered paragraphs
in your letter.

- 1.) BCL has never owned a Model No. 6400 package.
- 2.) BCL has made three shipments in the Model No. 6400 package since
February 28, 1978. Shipment dates were 6/13/78, 12/11/78 and 12/15/78.
The packages were leased from the owner, Nuclear Engineering Co., Inc.,
(NECO), P. O. Box 7246, Louisville, KY 40207. The packages were
unserialized at the time of shipment. NECO, Mr. Walt Hipshire, states
that they were the owner at the time of our shipments and even though
they own two such packages, no records were kept of which unit was used
by BCL.
- 3.) Not applicable. BCL is not an owner.

If you need additional information, please contact me at AC 614/879-5165.

Very truly yours,

Thomas R. Emswiler
Senior Specialist
Nuclear Materials Transportation
