

OFFICE OF THE
COMMISSIONER

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

COMMISSION
CORRESPONDENCE

May 2, 1980

Raymond Marty, M.D.
Chairman
Consumer Affairs Commission
Dept. of Nuclear Medicine/Ultrasound
The Swedish Hospital Medical Center
1211 Marion Street
Seattle, Washington 98104

Dear Doctor Marty:

Thank you for your letter of April 3, 1980. I am sorry to be so tardy in answering it, but I have been on a series of trips and speechmaking tours in the interim.

I think your project to put together a set of fact sheets relative to low level waste is an excellent one. It should have widespread use by the members of the American College of Nuclear Physicians and would also be very useful to us here.

We would be glad to help you with your task in any way that we reasonably can. I have asked Richard Cunningham, our Director of the NRC Division of Fuel Cycle and Material Safety to contact you directly to see what we might do.

Good luck in your effort.

Sincerely,

A handwritten signature in dark ink, appearing to read "J. Hendrie".

Joseph M. Hendrie
Commissioner
