DOCKET NUMBER
PETITION RULE PRM-50-26

University of Idaho

Idaho Falls Center
for Higher Education
1776 Science Center Drive
P.O. Box 778
Idaho Falls, Idaho 83401
(208) 526-1388

February 25, 1980

Secretary of the Commission
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attn: Docketing and Service Br.

Reference FED Reg of Feb. 15 Petition for Rule Making on Nuclear Attack
Protection

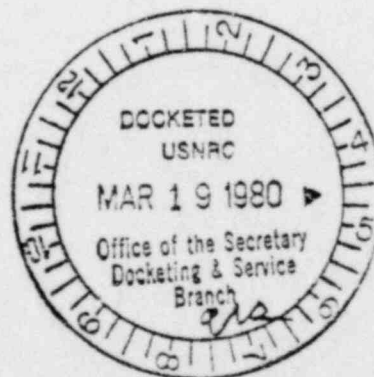

This rule making petition would best be discarded. If a direct or indirect
5 megaton hit from a nuclear attack were to happen the radiation so released
from the bomb would cover a greater area and spread further than the 100,000
curies of material.

If this Nation is going to protect all hazardous material against a 5 megaton
then all chemical fertilizer and similar plants should also be designed.

Next we will require a meteor umbrella.

Sincerely,

Marvin E. Eld
Assistant Director
