CONFERENCE OF RADIATION CONTROL PROGRAM DIRECTORS, INC.

April 15, 1980

1100 West 49th Street  
Austin, Texas 78756

Commissioner Joseph M. Hendrie  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Mr. Hendrie:

It is our pleasure to announce the 12th Annual National Conference on Radiation Control, to be held at the Galt House in Louisville, Kentucky, May 18 through May 22, 1980. The meeting is jointly sponsored by the Conference of Radiation Control Program Directors, the Food and Drug Administration, the Environmental Protection Agency, and the Nuclear Regulatory Commission.

The Conference is an organization whose membership is comprised of the directors of 60 radiation control programs within the United States; the staff personnel of these programs may also join as associate members. The Conference was formed to serve as a mechanism for providing a more functional means of exchanging information among member programs, as well as between the state and federal agencies in areas of mutual concern and interest.

During this Annual Meeting, formal presentations will be given which will examine current issues and concepts in regard to the use of radiation and its control with respect to the broad areas of the healing arts, industry, the environment, and non-ionizing radiation. A draft of the program is enclosed for your information. In addition, the program is designed to encourage informal exchange of information between individuals. Proceedings of the Annual Meeting will be published.

Please accept this letter as my personal invitation to you, on behalf of the Conference membership, to attend the Louisville meeting. In addition to allowing you to become familiar with the functions and goals of the Conference, this will give us an opportunity to personally meet with you. I hope that your plans will permit you to be a part of the Annual Meeting at the Galt House.

Sincerely,

David K. Lacker  
Chairman
