Operating Reactors Branch #3  
Division of Operating Reactors  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D. C. 20555

License No. DPR-35  
Docket No. 50-293

Sub: Schedule for Review of Generic DC Power  
Source Failure Analysis

Ref: Letter to G. C. Andognini from T. A.  
Ippolito "Effect of a DC Power Supply  
Failure on ECCS Performance" dated  
April 25, 1980

Dear Sir:

The purpose of this letter is to provide you with the schedule for our response to the referenced letter. We have initiated an evaluation of the GE study "DC Power Source Failure for BWR/3 and 4" to assure that the systems combinations assumed in this generic analysis are conservative for Pilgrim Unit #1. We expect to transmit the results of our evaluation to you by August 1, 1980.

Should you have any questions or concerns relative to this schedule please do not hesitate to contact us.

Very truly yours,

*G. Carl Andognini*  
EJ
