The amendments are effective as of the date of issuance.

The amendments add limiting conditions for operation and surveillance requirements for the low temperature overpressure mitigating systems and correct some clerical inconsistencies.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments.
