Dr. Billy D. Shipp, Director
Safety Division
Chicago Operations and
Regional Office
U.S. Department of Energy
9800 South Cass Avenue
Argonne, IL 60439

Dear Dr. Shipp:

This is to inform you of a recent organizational change in the Radiation Safety Program at Battelle's Columbus Laboratories. Mr. Homer M. Faust has been promoted to Assistant Group Manager for Nuclear Services. In this capacity, Mr. Faust assumes management responsibility of all laboratory nuclear service functions which include:

- Materials Accountability
- Operational Health Physics
- Environmental Health Physics
- Transportation

In his new position, Mr. Faust will continue to serve as the BCL Nuclear Materials Accountability Representative. In this new assignment, Mr. Faust will report directly to Dr. W. J. Madia, Manager of West Jefferson Nuclear Services. Mr. Faust's background with more than 25 years of experience in nuclear operations highly qualifies him for this responsible position. This organizational change will provide the desired continuity in our Radiation Safety Program.

Mr. Joe Dettorre, who formerly served as Manager of Nuclear Services, has been promoted to Projects Manager for Decommissioning and Decontamination Studies.
