PROPOSED RULE PR-*misc notice*
Reg Guide

November 28, 1979

Secretary of the Commission
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Docketing and Service Branch

Subject: Comments on Draft Regulatory Guide and Value/Impact
Statement, Task FP 811-4, dated September 1979

Dear Sir:

We have received the subject draft and have the following comment.

The draft, although it implies that it covers all dewatering systems, is silent on well systems. This silence could inadvertently preclude wells for permanent dewatering acceptability. If so, this could have a substantial impact on at least one nuclear project presently under construction.

We recommend that water wells be included in the introduction as an acceptable system for dewatering.

Very truly yours,

A. L. Cahn
Manager of Engineering
Thermal Power Organization
