Gentlemen:

This refers to the special, unannounced radiation safety inspection conducted by Mr. Anthony D. Gaines of this office on September 13, 1989, of the activities authorized by NRC Byproduct Material License 35-17178-01, and to the discussion of our findings held by the inspector with a member of your staff at the conclusion of the inspection. The enclosed NRC Inspection Report 30-12319/89-01 documents this inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspector.

The unannounced inspection was conducted at a temporary job site in Oklahoma City, Oklahoma. Work at this field site was found to be conducted safely and in compliance with NRC rules and regulations.

No violations or deviations were identified.

No response to this letter is necessary. Should you have any questions concerning this letter, we will be pleased to discuss them with you.

Sincerely,
