

OCT 17 1989

DOCKET NO: 70-371  
LICENSEE: UNC, Inc. (UNC)  
Montville, Connecticut  
SUBJECT: SAFETY EVALUATION REPORT, APPLICATION DATED SEPTEMBER 8, 1989,  
RE ORGANIZATIONAL CHANGES

Background

By application dated September 8, 1989, the licensee requested an amendment to License No. SNM-308 to add a Health Physics Supervisor position to their safety organization.

Discussion

The Health Physics Supervisor will report to the Director of Technical Services and will supervise the health physics technicians for the routine day-to-day activities associated with the Health Physics Laboratory. This new position will allow the Health Physicist Specialist more time to concentrate on the technical and managerial aspects of the radiation safety program. The proposed qualifications of the Health Physics Supervisor are a college degree and at least 1 year experience associated with nuclear safety concerns. Since the proposed qualifications do not require work experience specifically related to radiation protection, the staff recommends the following license condition:

- 40. Notwithstanding Section 2.2.3.5, the Health Physics Supervisor shall have a college degree and at least 2 years work experience in the field of radiation protection.

Conclusion/Recommendation

The new position of Health Physics Supervisor should enhance UNC's radiation safety program. Accordingly, I recommend issuance of this amendment, as conditioned.

The Region I Principal Inspector has no objection to this proposed action.
