Mr. Davis Hurt
Nuclear Regulatory Commission
Headquarters
Washington, D. C. 20555

Subject: West Valley Demonstration Project (WVDP) Technical Briefing to Nuclear Regulatory Commission (NRC)

Dear Mr. Hurt:

As discussed with you on the telephone, the West Valley Demonstration Project (WVDP) staff will be available to brief the NRC on two technical subjects on November 6 and 7, 1989, at NRC Headquarters. On November 6, 1989, we will present a technical briefing on the Drum Cell, starting with the design basis and construction through operation. Also presented will be the monitoring geotechnical data collected to date which will be used to measure the system performance over time. In addition, a technical visit to the NRC research park at Beltsville, Maryland, to observe closure design experiments will be useful for Project information. We propose to have three or four Project personnel plus a representative from the State of New York present. On the second day, we will continue discussions on the seismic work for vitrification. We expect to have three or four project personnel participating.

Should you have any questions please feel free to contact me at 942-4314.
