Re: Amendment to License # 13-24706-01

Dear Dr. Mallett:

This is in follow up to our telephone conversations concerning necessary training and experience for nuclear medicine physicians. It has now been six (6) months since we have received our NRC materials license for nuclear medicine procedures. During this time, I have gained additional experience with diagnostic nuclear medicine studies under the supervision of Marshall Miller, M.D.

A  
Fee  
P

On the basis of this experience, in addition to the training records submitted to your agency in previous applications, I request that my name be added to our license as an authorized physician user and Radiation Safety Officer.

Attached is our \$120.00 corporate check to cover the amendment processing fee.

Thank you.

Sincerely,

*Thomas R. White, M.D.*
