RE: Docket No's - 030-01761
030-00220

Dear Mr. Shanbaky:

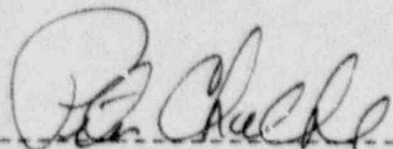

This letter is in response to the notice of violation we received August 1, 1989. The responses are lettered the same as the violations.

- A. The Nuclear Medicine Technologists have been given specific instructions regarding levels of surface exposure allowed under the various labels. They have also been instructed to notify the R.S.O. whenever a reading exceeds allowable limits.
Full compliance was achieved 7/10/89.
- B. The moly assay for 8/13/87 appears to have been recorded incorrectly. Other moly assays performed on elutions from the same generator were well within limits. The Nuclear Medicine Technologists have reviewed the acceptable trigger level and the regulatory limit. They have also been instructed to notify the R.S.O. whenever the trigger level is exceeded.
Full compliance was achieved 7/10/89.

If you require additional information, please contact us.

Terry D. Zipper M.S., D.A.B.R.
Radiation Safety Officer

Peter Chalke
Executive Vice-President
