RE: Radioactive Material License Nos. - 08-11182-01, SNM-1379
Docket Nos. 030-01334, 070-01417

Gentlemen:

In response to the Notice of Violation, received on July 18, 1989, regarding the inspection of the Nuclear Medicine Department at Greater Southeast Community Hospital which occurred on May 10, 1989, the following corrective measures have been instituted:

1. Effective immediately, the Radiation Safety Officer will, on each Monday, review the Nuclear Medicine daily surveys, dose calibrator constancy, radioactive material receipt, and weekly survey records including removable contaminate areas to insure that these records are being completed on the weekends and in a timely manner. The RSO will then initial these records.
2. In the event that the records are found to be incomplete, the Nuclear Medicine staff will be consulted and a record of the discussion will be maintained. Repeat occurrences will be grounds for disciplinary action by the Hospital.

Should you have any further questions, please do not hesitate to contact the undersigned at your convenience.

Sincerely,

Hospital Administrator
